Pervaziv AI

Securing the Healthcare Ecosystem with AI

White Paper

TABLE OF CONTENTS

EXECUTIVE SUMMARY

The healthcare industry is undergoing a rapid digital transformation driven by connected medical devices, AI-powered analytics, and interoperable health records. However, this innovation introduces significant security risks across a fragmented and multilayered technology stack. Healthcare organizations today are challenged with protecting sensitive patient data across diverse systems—ranging from embedded firmware in medical devices to complex AI models in analytics platforms.

Pervaziv AI provides end-to-end visibility and proactive vulnerability detection across the software supply chain—empowering healthcare organizations to move fast, innovate responsibly, and remain compliant with stringent data protection mandates.
